SUMMARY

Final-year BTech CSE student with strong expertise in backend development, cloud-native systems, and applied machine learning. Skilled in Go, Python, REST APIs, Docker, AWS, and ML frameworks including TensorFlow and PyTorch, with experience delivering scalable full-stack and ML-driven applications. Proven problem solver with competitive programming achievements and active open-source contributions.

TECHNICAL SKILLS

Languages, Frameworks and Databases | Python, Go, MySQL, Django, FastAPI

Developer Tools | Git and GitHub, Git Actions, VS Code, Jupyter, Linux, AWS, Docker, Docker Swarm.

Libraries | Pandas, NumPy, Matplotlib, TensorFlow, PyTorch, Sklearn.

PROJECTS

1.ForensicHub | Technologies - Go, React, TypeScript, REST API, React Bootstrap, Docker | Backend

- Developed a full-stack digital forensics training platform using a Go backend and a React/TypeScript frontend.
- Engineered a lightweight RESTful API in Go with the native `net/http` package to serve all application data, including user profiles, case studies, and legal resources, making it scalable
- Built a responsive, pixel-perfect user interface from scratch using React Bootstrap, ensuring a seamless experience across devices.
- Integrated the frontend and backend to create a dynamic user experience, featuring asynchronous data fetching with comprehensive loading and error-handling states.

2.Text Editor with AI Word Prediction | Technologies- Python, TensorFlow, NumPy, Tkinter, Pandas | ML

- Built an AI text editor with TensorFlow LSTM for word prediction, boosting typing efficiency.
- Tkinter UI with text formatting and light/dark mode, using Pandas for tracking and python-docx for export.
- Improved typing speed by 18% with accurate predictions and user-friendly design.
- Collaborated to refine model and shared with 7 users, gaining strong feedback.

3.Bengali Sentiment Analysis | Technologies: Python, Tkinter, Scikit-learn, NLTK, Pandas, NumPy | ML

- Developed a sentiment analyzer for Bengali text using ML to classify positive, negative, or neutral sentiments.
- Implemented text cleaning, stop words removal, vectorization, and prediction with 77% accuracy, 79% precision.
- Built a Tkinter GUI for user input of Bengali text and real-time sentiment display with logo integration.

EDUCATION

- | | |
|--|--------------------------|
| • VIT Bhopal University Bhopal, Madhya Pradesh | October 2022 – July 2026 |
| • B. Tech in Computer Science Engineering, CGPA 8.75/10 | |
| • Lord Buddha Public School Kota, Rajasthan | June 2021 – July 2022 |
| • Class 12 th CBSE, CGPA 8.51/10 | |
| • LBS Convent Sr. Sec. School Kota, Rajasthan | June 2019 – July 2020 |
| • Class 10 th CBSE, CGPA 9.43/10 | |

ACHIEVEMENTS

TCS CodeVita | 2024 Global Rank 3279/500,000 | 2025 Global Rank 1314/500,000

Global competitive programming contest | Complex algorithms and data structures | Optimized solutions under strict time constraints | Demonstrated proficiency in problem decomposition and debugging

Open-Source Contribution | SSOC'25, GSSOC'24, GSSOC'24 Extended, Hacktoberfest

Delivered production-grade code to open-source repositories | Enhanced skills in version control and collaborative workflows | Contributed to scalable software projects | Engaged with global developer ecosystems

Nokia Accelerate Her | Stage 1: Top 2000/10,000 | Stage 2: Top 700/3500

Solved advanced technical challenges in telecommunications domain | Applied expertise in coding and system design | Developed innovative solutions for industry use cases | Excelled in high-stakes, time-bound evaluations

CERTIFICATIONS

- **DevOps & Agile | IBM CEP:** Skilled in CI/CD pipelines and agile methodologies.
- **AWS Cloud Computing and Cloud Architect | AWS Academy:** Skilled in scalable, cost-effective AWS services and cloud architectures.
- **Linux LFS101 | Cisco/The Linux Foundation:** Proficient in Linux admin, CLI, and scripting.
